

Manuel SANTISTEBAN

Team Leader & Lead Developer | Symfony · Angular · CI/CD · Agile

Remote OK | Notice period: 3 months

Location: Montélimar, Drôme (26) - South-East France | Email: xen3r0@gmail.com | LinkedIn: linkedin.com/in/santisteban-manuel | GitHub: github.com/xen3r0

PROFESSIONAL SUMMARY

16 years at the same company, on the same product - and I ended up leading the team that builds it. Started as a developer, became Team Leader of an 11-person team: hiring, upskilling, roadmap, Agile rituals. I keep my hands in the code - Symfony 7, Angular 21, GitLab CI/CD - because a lead who stops coding quickly loses touch with technical reality. Open to remote, 3-month notice.

KEY SKILLS

Management	Hiring, onboarding, coaching, annual reviews, training plans
Leadership Agile	Scrum, Kanban, sprint planning, reviews, retrospectives, roadmap management
Architecture	Code review, GitLab CI/CD, automated testing, TDD, SOLID, Clean Code
Communication	Management reporting, workshop facilitation, risk management
Back-end	PHP 8.4, Symfony 7.4, Node.js, Nest.js, API REST, Doctrine ORM, PHPUnit
Front-end	Angular 21, RxJS, Signals, TypeScript, Angular Material, Bootstrap, Jasmine
DevOps / CI-CD	Docker, GitLab CI/CD, Nginx, Git Flow, continuous integration, continuous deployment
Databases	PostgreSQL, MySQL
Outils	Jira, Confluence, GitHub, GitLab, PHPStorm, Junie, Claude Code, Codex, MCP

WORK EXPERIENCE

Team Leader - WinLassie

March 2014 - 2026 (12 years)

- Managing a cross-functional team of 11 developers (back-end, front-end, QA)
- Hired and onboarded 4 developers - 0 involuntary turnover over 3 years
- Product roadmap prioritisation in direct collaboration with business stakeholders
- Scrum ceremonies facilitation: sprint plannings, reviews, retros
- Hands-on mentoring: pair-programming, structured code reviews, individual upskilling plans
- GitLab CI/CD pipeline built from scratch - deployment time reduced by 75%
- Daily use of AI coding assistants (Junie, Claude Code, Codex) for code generation, testing and review - with hands-on experience of Skills and MCP servers to automate development workflows

Lead Developer - WinLassie

September 2010 - March 2014 (3.5 years)

- Full rebuild of the legacy WinDev desktop app as a web platform - Symfony 2, AngularJS, REST APIs built from scratch
- Set up the team's technical foundations from scratch: Docker, GitLab CI, Git Flow
- Technical mentoring of 3 junior developers

Junior Software Developer - WinLassie

2009 - 2010

- Development on the WinDev business app - first job, first real encounter with production code
- Requirements gathering and technical spec writing

KEY ACHIEVEMENTS

- GitLab CI/CD pipeline built from scratch: deployments -75%, frequency multiplied by 4
- Team of 11 built and upskilled - 0 involuntary turnover over 3 years
- AngularJS to Angular 21 migration (20 versions) across ~1 million lines of code - service never went down
- 32,000+ PHPUnit / Jasmine unit tests, 85% coverage - no major regression in production for 3 years

EDUCATION

BSc Computer Systems & Software - IUT de Valence
HND Business Computing - Lycée Louise Michel

2009 - 2010
2007 - 2009
